Dear,

Par-ky flooring is a veneer floor made by Decospan. For LEED certified projects, Par-ky can make a customized sustainable floor. This floor is maximum LEED compliant.

The construction of the product is as follow:

- The core board is a 6, 7.2, 9 or 12mm HDF coreboard which is FSC mixed 80% certified and CARB 2 compliant (very low emitting VOC).
- The veneer is FSC certified or controlled wood. This is the case for oak, walnut, beech and cherry. Other wood species are available on demand.
- The build in cork underlay is FSC certified and microban treated.
- The glue, stain and lacquer are all NAUF and low emitting VOC per LEED specifications.

The final product is NAUF, CARB 2 compliant and FSC Mixed 70% certified.

Due to this, Par-ky has the potential of minimum 4 LEED credits supported:

- Materials & Resources: 7
- Indoor Environmental Quality: 4.1, 4.2, 4.4

The product has a UNICLIC installation system which makes it possible to easily recycle the floor at the end of its lifecycle. Decospan can recycle to boards to make green energy at its Belgian production plant.

Do not hesitate to contact us if you require any further information or assistance.

Best Regards

Pieterjan Desmet
Sales and Marketing Director
