

Country

Budget-friendly, rustic oiled parquet floor

Country is a budget friendly flooring with a rustic appeal. This flooring is a must is in terms of price / quality for those who like a rustic look.

Pronounced knots and cracks were deliberately chosen and left partially open.

The colours are more intense because different finishes have been applied.

The objective of the Country collection is creating real authenticity. Therefore one must always keep in mind that the planks can partly be very rustic.

Therefore we expressly recommend to sort out a number of planks during the installation of the parquet if they are too rustic to your personal taste.
