SAY HELLO TO OUR NEW

GLUEDOWN COLLECTION

In response to growing demand, we're expanding beyond our trusted click range with a high-end gluedown collection. This diverse collection includes three different sizes. With its 2.5 mm thickness and robust 0.55 mm wear layer, it delivers exceptional durability and style.

**Same size,
same color,
same embossing**

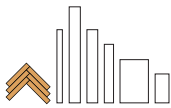

The new Floorify Gluedown collection mirrors the stunning designs, authentic textures and popular sizes of our rigid click floors. We simply copy pasted the three existing click ranges Herringbone, Long Planks and Big Tiles and converted them into a gluedown variant, maintaining the same colors, embossing and sizes!

As both click and gluedown options are now available, we offer a solution to suit every space and need. Check out our complete collection and discover it for yourself.

ff
